

# PCI DSS Awareness Curriculum

COURSE

LESSON COUNT: 7

## PCI DSS Awareness: Back of House

LESSONS

LEARNING OUTCOMES

### Your Impact – Fundamental Security Basics

- Learners will be able to identify fundamental changes they can make to their daily workflow to help protect credit card data.

### Your Impact – Passwords

- Learners will be able to demonstrate how to control access to sensitive information by using strong passwords that must be changed on a regular basis.

### Your Impact – Electronic Communication

- Learners will be able to identify where all the copies of information included in an email exist and recognize the increased risk of data breach.

### Your Impact – Physical Access

- Learners will be able to identify the physical controls that are recommended to secure premises from unlawful access and to protect any CHD that may be used for fraudulent purposes.

### Your Impact – Equipment Tampering and Malicious Code

- Learners will be able to recognize the signs of physical tampering on POS terminals, network devices, and computers in their work environment.

### Your Impact – Social Engineering

- Learners will be able to describe what social engineering is and how to recognize the signs and take actions to reduce the risk of it occurring at their workplace.

### Your Impact – Incident Reporting

- Learners will be able to describe what to look out for and what to do and what not to do when they suspect a data breach has occurred.
